

HEROLOOP

A dark-fantasy AFK RPG built for the Solana Seeker phone.

Play to earn: **play, earn SKR, mine, earn ORE.**

heroloop.xyz

Play → Earn SKR → Mine → Earn ORE

THE GAME

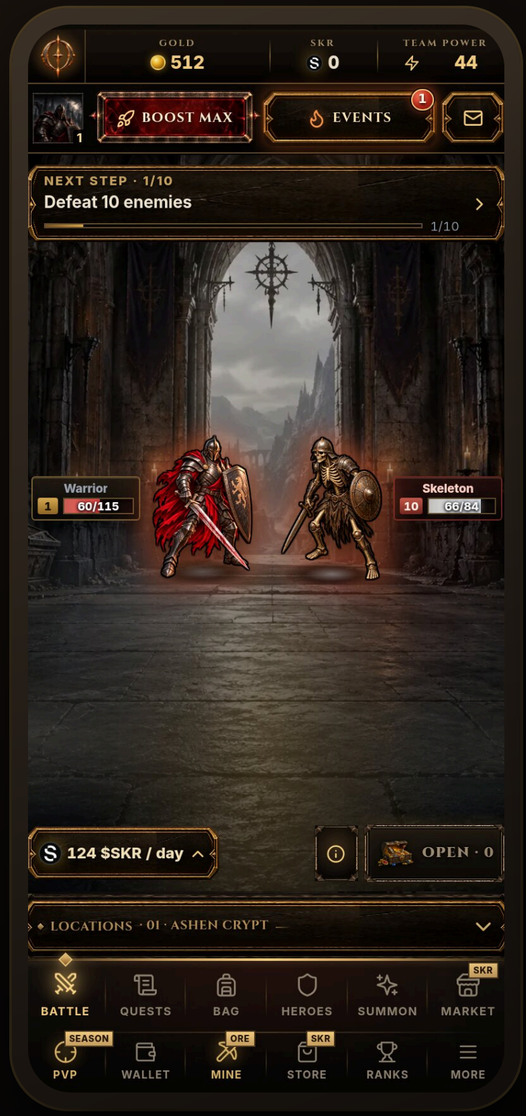

Easy to start. Hard to put down.

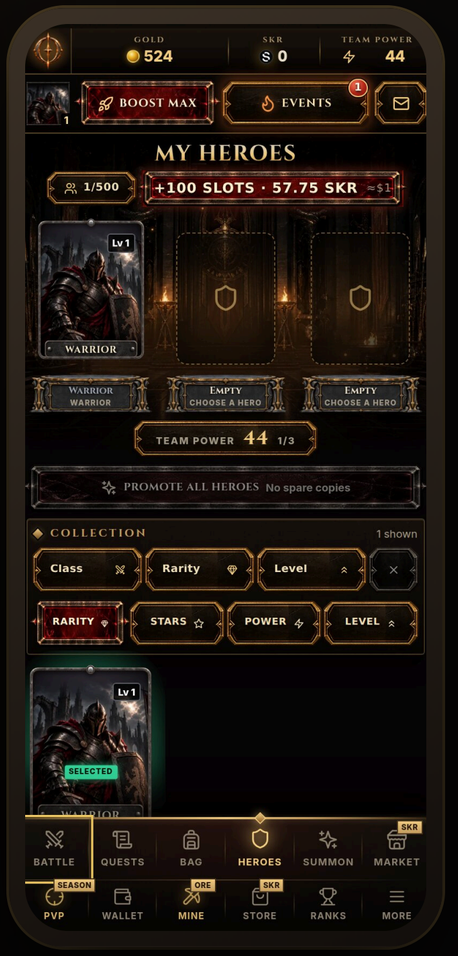

Your squad fights through dark-fantasy locations on its own, also while the phone is in your pocket. You come back to loot, decisions and a stronger team.

Fight → **Loot chests** → **Equip & enchant** →

Summon heroes → **Beat the Boss** ↺

- **AFK progression** that keeps running between sessions.
- **Five classes** — Warrior, Mage, Ranger, Assassin, Druid — in a three-hero formation.
- **Dungeons and shared Bosses** with their own mechanics and chests.

LIVE IN THE APP TODAY

Deep progression, already playable

45
Heroes
5 classes × 9 rarity tiers, from Common to Celestial.

20★
Star promotion
Merge duplicates to promote heroes up to 20 stars.

54
Items
Weapons and armour across 9 gear slots, with upgrades.

+20
Enchanting
Enchant every piece of gear up to +20.

20
Locations
10 standard and 10 endgame locations.

200
Levels
Content scales from level 1 to 200.

Also live: Battle Pass Season 1 (100 levels), Bosses and Boss Keys, four-room dungeons, Training Camp, Ranks, a 28-day login calendar, weekly events, the player Market and the SKR Store.

A STORY YOU PLAY, NOT JUST WATCH

Betrayed. Killed. Returned.

The opening is a painted motion comic: your friends shut the gate on you and Morvane, the Forsaken, ends you. You wake on an altar.

- **Story scenes alternate with real play.** Real gear, a real defeat, real summons.
- **Game events trigger the next scene** — equip your first item and the road leads back to Morvane.
- **Voiced, scored and animated** in code on top of painted frames.

RETENTION BY DESIGN

A REASON TO COME BACK EVERY DAY

Offline progress

The squad keeps fighting; returning means collecting, upgrading and pushing further.

Events hub

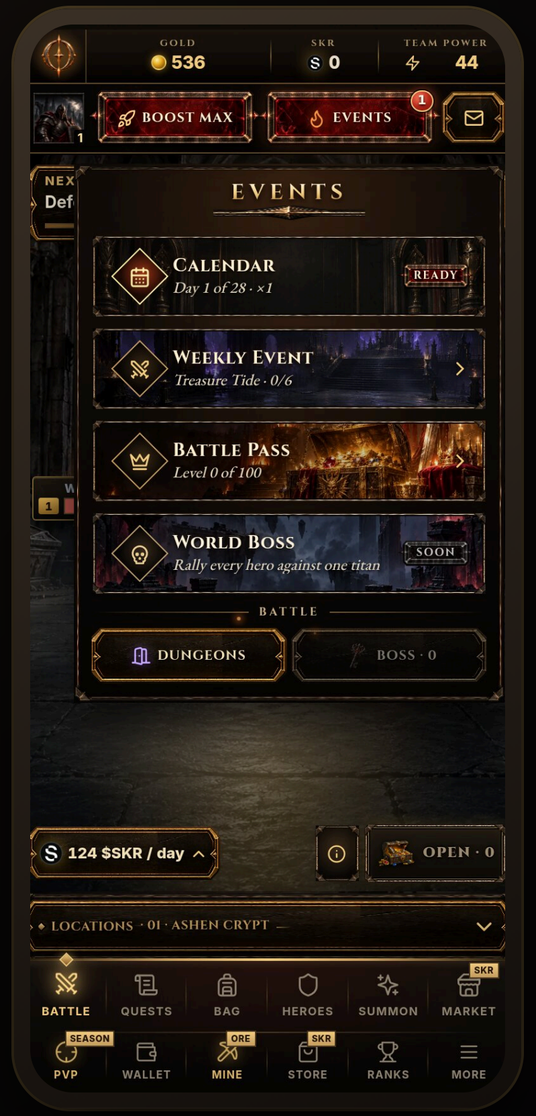

A 28-day login calendar and weekly Friday event quests.

Bosses & Dungeons

Boss Keys, four-room dungeons, shared Bosses and Dungeon Chests.

Collection

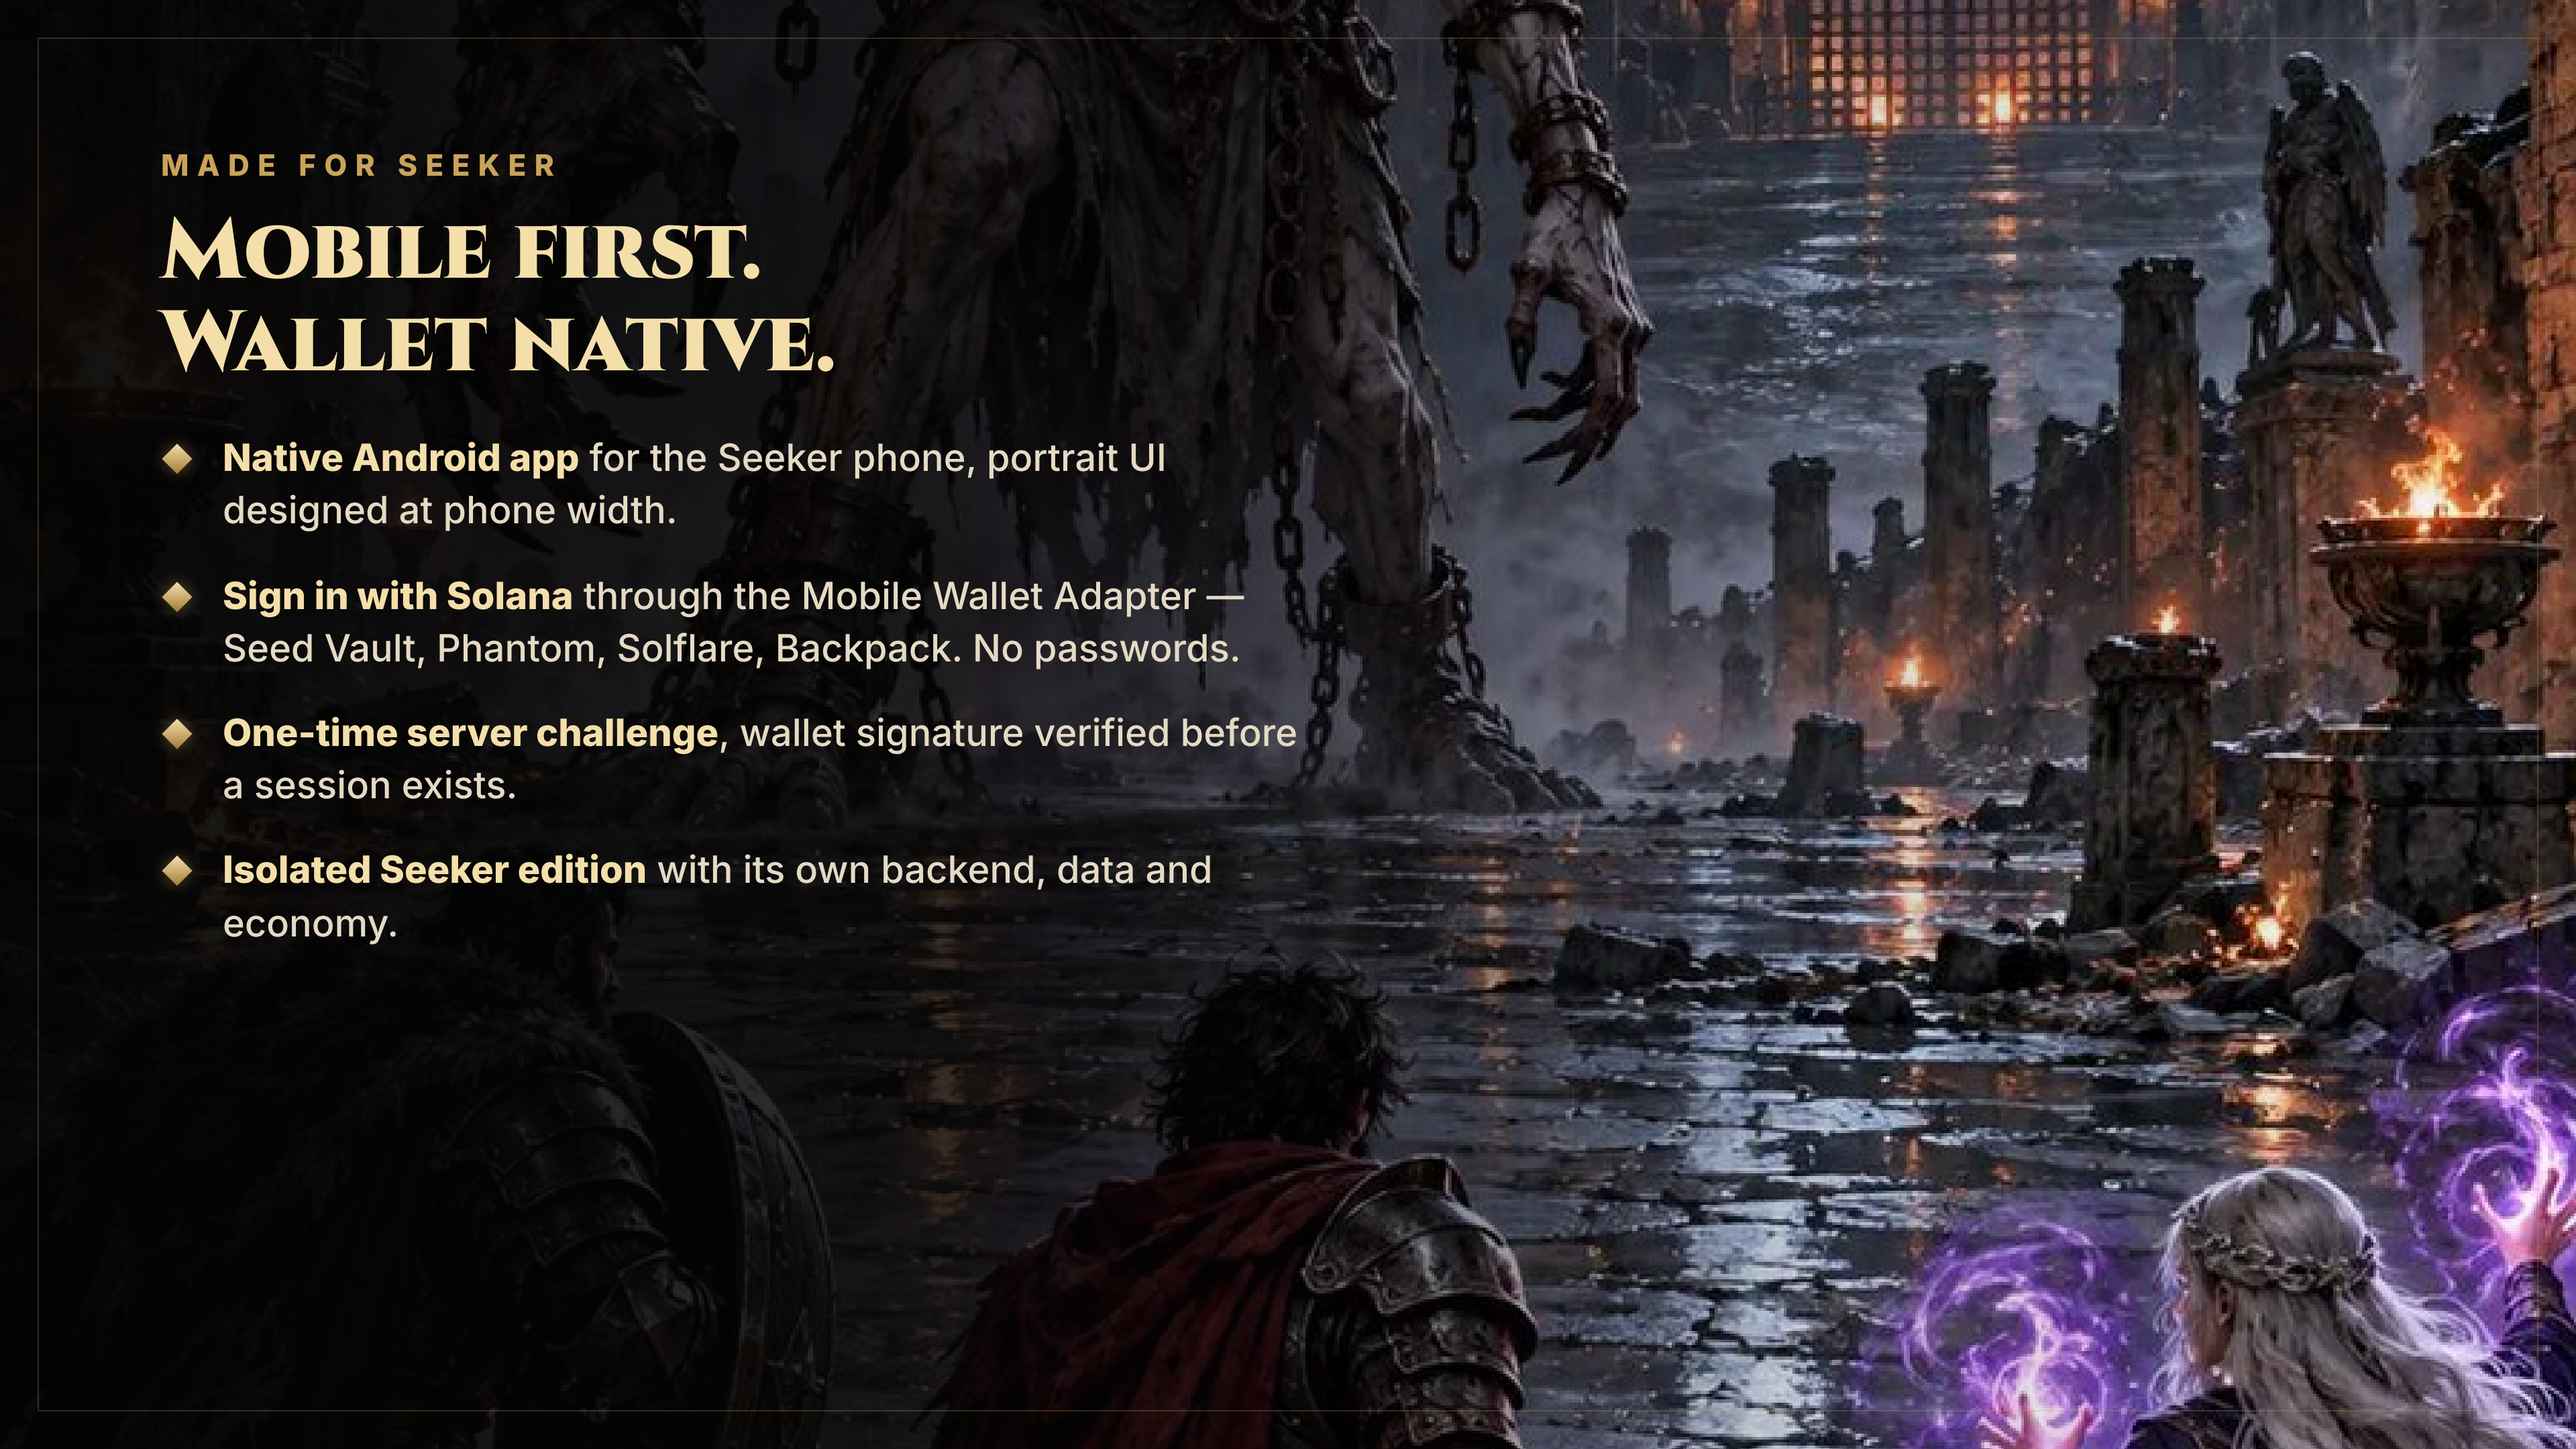

Summon heroes, promote stars with duplicates, upgrade and enchant gear, climb the Ranks.

MADE FOR SEEKER

Mobile first. Wallet native.

- **Native Android app** for the Seeker phone, portrait UI designed at phone width.
- **Sign in with Solana** through the Mobile Wallet Adapter — Seed Vault, Phantom, Solflare, Backpack. No passwords.
- **One-time server challenge**, wallet signature verified before a session exists.
- **Isolated Seeker edition** with its own backend, data and economy.

PLAY TO EARN

Play. Earn SKR. Mine. Earn ORE.

Play → Earn SKR → Mine with heroes → Earn ORE ↺

Earn SKR

Sell the loot you win on the player Market; trades are priced and settled in SKR.

Mine & earn ORE BETA

Send your heroes into ORE protocol rounds from inside the game; ORE winnings are claimed to your balance.

Store & upgrades

Summons, chests, potions and upgrades paid in SKR with server quotes.

BOOST MAX

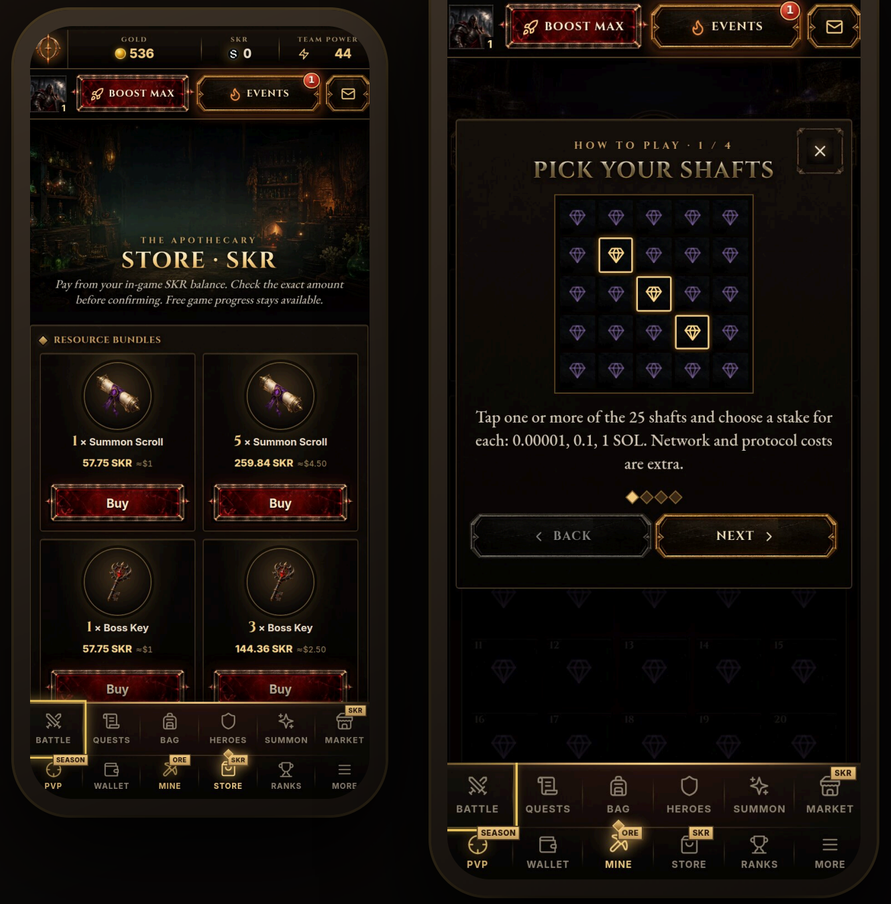

Holding and spending SKR turn into quests with clear, server-checked progress.

Deposits

Deposit SKR from your wallet; the balance updates after the transaction is verified on chain.

Withdrawals

Review amount, destination and fee; payouts are signed and tracked to the chain.

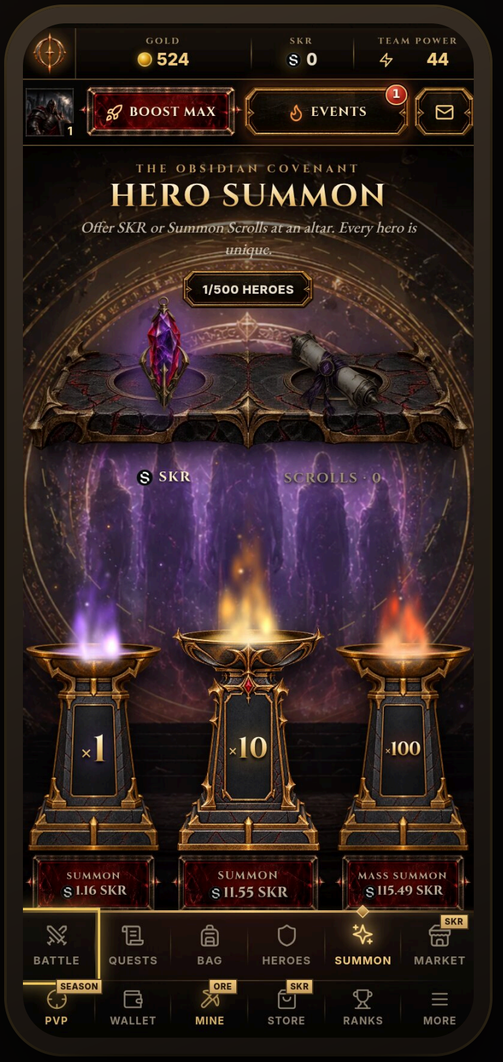

Mint `SKRbvo6Gf7GondiT3BbTfuRDPqLWei4j2Qy2NPGZhW3` · integer minimal units, no floats.

BUILT TO VERIFY

The server is the authority

- **Rewards, balances, inventory and combat** are computed on the server; the client never sends values the server trusts.
- **Double-entry SKR ledger** in its own database, idempotent and balanced per event.
- **Replay protection** on payments and claims; every reward is granted exactly once.
- **Shared deterministic combat rules** run on both client and server.
- **Open source for judges**: client, backend, Android app and game data in one repository.

UNDER THE HOOD

Stack

Client

React, TypeScript, Vite. Painted art, code-driven animation, Web Audio sound.

Android

Full-screen WebView shell with Mobile Wallet Adapter; reproducible debug APK build.

Backend

Deno API, worker, PostgreSQL with migrations, Supabase GoTrue auth, Docker Compose.

Economy

Separate SKR ledger database, on-chain verification, signed payout outbox.

Game data

Versioned balance tables, tutorial quests and feature flags in config.

Operations

Exact-commit releases, verified recovery points and public health gates.

NEXT ADVENTURE

Roadmap

- **Endgame hero upgrades** — Essence and more, on top of the live endgame locations.
- **A sixth hero class**, introduced through the story.
- **Crafting for the rarest gear** — rarity tiers 10 to 12.
- **Pets, new skills and auras**, plus lots of cosmetics.
- **20 story-driven regions**, 200+ enemies and 20 Bosses; chapter two follows Elyra to Blackthorn.
- **Season 2** — Battle Pass v2, World Boss, PvP arena and Guilds.
- **ORE Mine** — ORE claims; **play to earn** SKR scaled by squad power.
- **New animations, better graphics and sound**, deeper performance optimization.
- **Solana dApp Store** release of the Seeker app.

TRY IT

HeroLoop

Build your squad. Return stronger. Built for Solana Seeker.

Play

Install the APK on a Seeker or any Android phone with a Solana wallet, or open `heroloop.xyz`.

Source

Build steps for the client, backend and APK are in the README:
`github.com/drmz42/heroloop-clockin`

Demo

The video walks through the story, the core loop and the SKR economy:
